

PHONICS

We have been learning about **Compound Words**.

These will help us with our spelling.

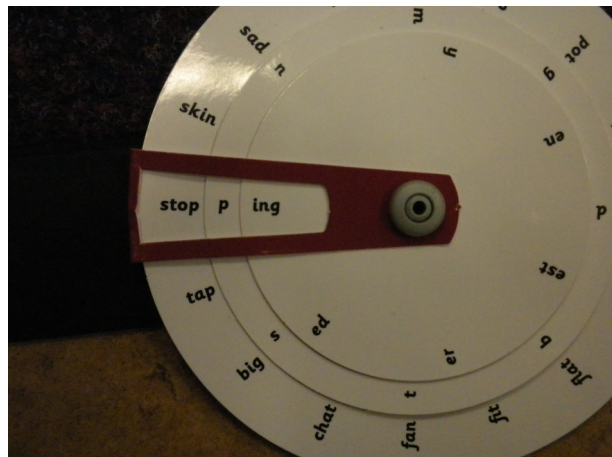

A Compound Word is formed when two real words join together to make a new word.

E.g. tooth + brush = toothbrush

Sun + shine = sunshine

Snow + man = snowman

We played some card games to help us build the words. We looked for spelling patterns within each word to help secure digraphs, trigraphs and long vowel sounds.

We have also been learning the **rules for adding suffixes**. We used the spinners to make words, then we decided if they had used the Nothing, Double or Drop rule. We are getting really good at recognising the rules now!
