

Red Class - Our Learning

English

This term, we've been planning and writing a range of non-fiction texts including; newspaper reports, non-chronological reports, fact files and letters. We have also been covering Year 4 grammar in detail, in line with the new curriculum expectations. Our first book of the term is called Amazing Animals of the Sea, which is a non-fiction book. We've enjoyed researching and planning work around sea creatures and learning fantastic facts along the way!

Maths

Our learning this term has covered measurement (length, mass and capacity), perimeter, time, 2D and 3D shapes and angles. We have been applying our knowledge to different types of questions in order to improve our reasoning skills. We have also been spending a lot of time solving word problems linked to our learning and improving our times table knowledge through our weekly times tables test, and through games, such as The Times Tables Train and Around the World (our favourites!).

Topic

In our topic lessons, we have been looking at Water, including; the 3 states of water, the water cycle and how rain and clouds are formed. We have really enjoyed learning key terminology, such as evaporation, condensation and precipitation, and understanding why the water is vital for all life on Earth.

Science

In our Science lessons, we have been studying plants and their functions. We're currently undertaking an experiment to find out what plants need to survive (some of us are leaving plants in the dark, some are not feeding the plant water and others are over-feeding the plant water). We are excited to find out analyse the results of our investigation, and present them using the scientific language we have learnt along the way.

P.E.

We are currently enjoying our swimming lessons where we are learning key skills and practising swimming lengths using different strokes. We are also learning gymnastics

where we are putting together routines which involve a range of balances and shapes, as well as learning to use all parts of our bodies when travelling in different ways.

We also enjoy our weekly Computing, PSHE, RE, Music/Spanish and Values lessons.
