

Science Week

This year the Science Week theme was 'Journeys', in Orange Class we took this theme as methods of travel. We had our parents in to help us build egg parachutes and test paper aeroplanes.

For our egg parachutes we had a boiled egg and used the materials provided to construct a parachute for it. The parachutes were then dropped from the top of a ladder. Some of the parachutes were very creative!

In the afternoon, we made four different paper aeroplanes. A classic paper aeroplane, a helicopter, an air glider and a straw rocket. We then used our measuring skills to measure which paper aeroplane travelled the furthest.

We thoroughly enjoyed having parents in our classroom during Science Week.
