

My volcano flowed lava with the help of bicarbonate of soda and vinegar.

Watch out girls! Volcanic eruption!

## Year 4's Red Class – Topic Extreme Earth –Volcanoes

### Did you know?

The name "volcano" has its origin from the name of **Vulcan**, a god of fire in Roman mythology.

As pressure in the molten rock builds up it needs to escape somewhere. So it forces its way up "**fissures**" which are narrow cracks in the earth's crust. Once the magma erupts through the earth's surface it's called lava.

Oh! Look the magma is erupting!

This volcano was made out of paper so as the pressure built up it forced its way up the 'fissures' then erupted.
